

Fish Pattern Craft

①

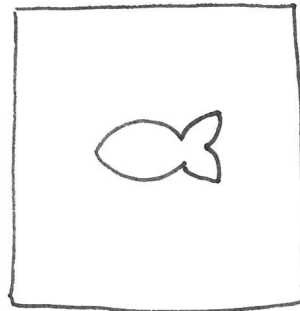

Take a small piece of cereal box cardboard about 8x12cm

First draw a leaf shape. Then add a tail shape.

②

Cut out the fish shape and stick it down in the middle of a piece of paper

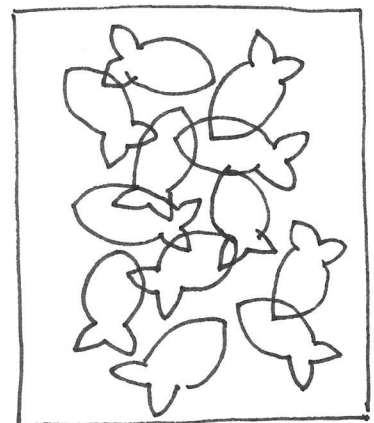

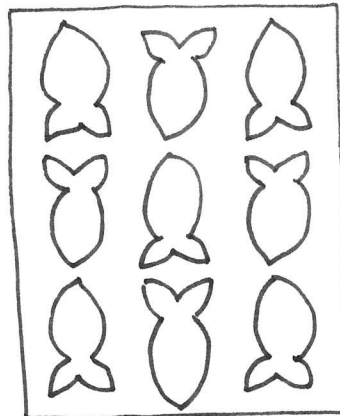

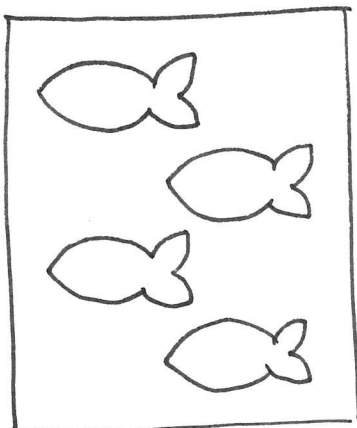

③

Place another piece of paper over the top, positioning it where you want to start your fish pattern. Using a wax crayon on its side, rub over the area until the fish shape is completely revealed!

④

Move the paper around to create a pattern and use different colours of your choice. 1 fish becomes multiplied over and over again to create your original, special design!

Here are SOME IDEAS. What will you create?!
